

## **MIRACULINS INC.**

Miraculins Inc. is a medical diagnostic company focused on developing and commercializing diagnostic tests and risk assessment technologies for unmet clinical needs. The Company's lead program is the PreVu® Non-Invasive Skin Cholesterol Test, a painless and inexpensive tool for cardiovascular risk assessment. Miraculins is currently recruiting to fill the following position:

### **DIRECTOR, PRODUCT DEVELOPMENT**

This position's primary responsibilities are to provide scientific knowledge and leadership supporting Miraculins' product development and commercialization activities. In addition to bringing technical expertise to the senior management team, this position is also responsible for the development and maintenance of Miraculins intellectual property portfolio, for preparing and presenting summaries of scientific information and for supporting regulatory initiatives and clinical studies.

#### **Qualifications:**

- M.Sc., Ph.D. or equivalent and/or demonstrated industry experience
- A minimum of 8 years industrial and/or academic experience directing research and development projects
- Familiarity with patenting and intellectual property protection
- Experience within the life sciences field
- Demonstrated ability to analyze and communicate scientific data

Miraculins Inc. is seeking qualified individuals, including non-Winnipeg based candidates with appropriate experience. The Company offers a competitive salary, commensurate with experience level, and the opportunity to work within a dynamic, growing environment. Qualified individuals are encouraged to submit a cover letter stating their salary expectation along with a detailed resume to:
